PREFLOP BY DEPTH

STACK	OPEN	3-BET	KEY ADJUSTMENT
60bb+	2.3bb (+1 per limper; live, iso 4–5bb)	3× IP, 4× OOP	Call opens with small pairs and suited connectors in position: implied odds are big
35–60	2.2bb	6.6 IP / 8.8 OOP	Small pairs and 65s–87s mostly fold to opens; offsuit broadways and suited aces in
22–35	2.3bb	Often all in	Re-jam over late opens (66, ATo, A5s vs BTN); don't open hands you'd fold to a jam
15–22	2bb or jam	All in	Raise-or-fold; calling a 3-bet is rarely right
<15	Jam / min-raise	All in	12bb push/fold charts; SB limp-or-jam

LATE DAY 1: THE BUBBLE

- **Big stack:** open and 3-bet medium stacks relentlessly; they can't call without a big hand.
- **Medium stack:** fold marginal calls (AJo/KQo vs a jam); attack shorter stacks, avoid the big stack on your left.
- **Short stack:** jam rather than min-raise; prefer jams with an ace (it blocks calls).
- Calling a jam on the bubble needs about 10–15% more equity than normal. Shoving still works.
- Bagging any stack = cashing. A min-cash beats busting on a 55/45 flip, so take the low-variance line.

POSTFLOP (FROM THE SOLVED SPOTS)

- **C-bet small (⅓) a lot** on A/K-high dry boards when you opened: your range is far ahead.
- **Check more** on low, connected boards (7-6-5, 6-4-3) vs the big blind: they hold the straights and two pairs.
- **Bet big (¾)** only with a polar range: sets and top pair+, plus draws and no-showdown hands like QJ on 8-7-4.
- **Check-raise small bets, call big ones.** BB check-raises about 20% vs ⅓ pot, 9% vs ¾ pot.
- **Out of position raise draws; in position call them.** Middle pairs and weak top pair: call, don't raise.
- **Shallow (20–30bb):** top pair, good kicker is a raise-or-get-it-in hand. In 3-bet pots (SPR 2–3) get it in on the flop.
- **Turn:** raise less; turn raises are mostly two pair or better.

LIVE-FIELD ADJUSTMENTS

- **Iso limpers bigger** (4–5bb +1 per limper) with strong hands; play pots in position.
- **Value bet thinner.** Recreational players call too much: bet top pair for three streets, size up with nuts.
- **Bluff less vs stations,** more vs tight regulars. Multiway: c-bet only with real hands or strong draws.
- **Respect big turn/river raises** from passive players: they under-bluff. Fold one-pair hands.
- Note who limps, who 3-bets light, who folds to c-bets, and who is short; adjust ranges accordingly.

GAME PLAN

- **Register by level 3** to play 60–125bb deep, your biggest edge with 60-minute levels. Entering at level 7 is about 21bb.
- **Re-entry:** only before level 4. If you bust early, re-enter; you still start with 60bb or more.
- **Levels 1–4:** low-risk, see flops, value-bet weak players. Avoid stacking off with one pair deep (SPR > 5).
- **Levels 5–8:** stacks drop to 20–40bb; steal and re-jam. Antes make every orbit costly: 1.5bb + 1bb ante.
- **Levels 9+:** push/fold and bubble rules. Bag chips; Day 2 restarts at 11am.
- Eat at the dinner break, hydrate, and review a few hands each break: what did they show down?
